

Farman Ali

Web developer

Hello, my name is Farman, and I'm a front end web developer with a strong grasp of front end abilities such as JavaScript, HTML, CSS, and the Bootstrap framework, as well as the java script library React Js, and I'm enthusiastic in solving algorithms like sorting and searching, as well as producing clean code and truly like learning new things. I'm currently looking for an opportunity to work in a place where I may further my career as a front-end web developer.
